Professional summary

Data Analyst with 3+ years of experience in data analysis, CRM administration and reporting automation. At Respect Energy I developed the CRM for 200–300 sales users: I delivered around 100–120 change requests and handled 200–300 bug reports. I answer business questions with SQL (Snowflake) and Power BI, and automate repetitive work with Python, n8n and APIs.

Work experience

Sales Support System Administration Specialist (CRM) | Respect Energy, Warsaw | 08.2024 – 09.2026

- Administered the Salesbook CRM for 200–300 sales users (sales pipeline, data structure, permissions); trained around 200 of them.
- Delivered around 100–120 change requests, from requirements gathering through UAT to release, and handled 200–300 bug reports.
- Automated price lists in the CRM: minimum prices are pulled from SQL instead of being copied by hand from emails. This cut errors caused by outdated price lists and shortened offer preparation; reps now only add their margin.
- Moved the pricing-request process from email into the CRM: a rep requests a quote by changing a status, and the pricing team answers in the system, with full history and visibility.
- Configured CRM workflow automations, including email notifications and automatic notes on status changes.
- Built 4 Power BI dashboards on Snowflake data (SQL, DAX): CRM licence costs based on active accounts, the sales funnel of a new product (customers and volume by status), current and historical price lists, and key-account campaign progress by sales rep.
- Automated a weekly key-account KPI report in Python (ETL: API → Python → Excel → automatic email): number of meetings and active threads, week-over-week trend, each rep against the team average; the report replaced about 2 hours of manual work per week.
- Answered business questions with data, writing SQL queries joining tables in the Snowflake data warehouse.

Junior Analyst | Sky Estate, Warsaw | 03.2024 – 07.2024

- Sourced and analysed around 40–50 real-estate investments worth millions of PLN each, calculating ROI in Excel financial models.
- Recommended to the Board which buildings to buy and how to commercialise them, based on ROI comparisons.
- Analysed rent rolls and product performance using SAP Business One data.

Procurement Administrator (SAP) | Cellnex, Warsaw | 05.2023 – 03.2024

- Ran procurement processes and analysed procurement data in SAP.
- Prepared operational Excel reports for the finance and operations teams.

Projects (portfolio)

- Warsaw apartment prices (Python, pandas, numpy, shapely): Analysis of 8,665 listings: data cleaning, geo-matching to districts (shapely), a regression model and a price estimator. https://korneldyb.github.io/projects/warsaw-housing/
- Automated NBP FX report (Python, GitHub Actions, pytest): Daily GitHub Actions pipeline: NBP API fetch, KPIs, report, dashboard and an alert on large moves. https://korneldyb.github.io/projects/nbp-rates/
- Lead scoring (JavaScript): Sales tool ranking leads as Hot/Warm/Cold with transparent rules, with CSV import and export. https://korneldyb.github.io/projects/lead-scoring/

Technical skills

- Data analysis & BI: SQL (joins, data modelling), Snowflake, Power BI (DAX), Power Query, Excel (financial models, VBA), statistics
- Automation & integrations: ETL, API, n8n, Python (Pandas, NumPy, BeautifulSoup, Selenium), Excel VBA, GitHub Actions
- Systems: CRM (Salesbook), Salesforce, SAP, SAP Business One, Jira, Confluence
- Methods & business: Agile / Scrum, requirements analysis, change requests, UAT testing, user training, KPI reporting

Courses

- The Complete SQL Bootcamp: Go from Zero to Hero (Udemy)
- Microsoft Power BI Desktop for Business Intelligence (Udemy)
- Python for Data Science and Machine Learning Bootcamp (Udemy)
- Business Analysis Fundamentals – IIBA endorsed (Udemy)
- Full list of courses (incl. BPMN 2.0, Jira & Confluence, UML) on LinkedIn
