Kornel Dybalski

CRM Specialist · Sales Operations

I tidy up CRMs and sales processes so reps can sell instead of retyping emails.

200+	100+	200+	~200
sales reps on the CRM	changes delivered	tickets resolved	users trained

Experience

Sales Support System Administration Specialist (CRM)
08.2024 – 09.2026

Respect Energy · Warsaw

- Owned the Salesbook CRM (SaaS) for 200+ sales reps: pipeline, data and permissions. Trained around 200 users.
- Delivered 100+ CRM changes, from requirements through UAT to release, and resolved 200+ user tickets.
- Built 4 Power BI dashboards for sales and management (Snowflake, SQL, DAX).
- Automated a weekly key account KPI report in Python. It sends itself and saves about 2 hours a week.

Case: pricing requests from email to CRM

Problem	Reps requested quotes by email, minimum prices were retyped by hand and the history got lost in inboxes.
What I did	Moved quotes into the CRM (request by status change, reply in the system, automatic notifications) and connected minimum prices to an SQL database.
Result	Full history of every quote in one place, fewer errors from outdated price lists and faster offer preparation.

Junior Analyst
03.2024 – 07.2024

Sky Estate · Warsaw

- Analysed 40+ properties (ROI models in Excel) and prepared recommendations for the Board.
- Maintained rent rolls in SAP Business One for the finance team.

Admin Procurement SAP
05.2023 – 03.2024

Cellnex · Warsaw

- Handled procurement processes in SAP and prepared operational reports for the procurement team.

Presales
09.2022 – 03.2023

DrSmile · Warsaw

- First point of contact for customers: conversations, presentations and matching the solution. Daily work in Salesforce.

Projects

AI consulting website in progress: booking form, lead goes to HubSpot, email and calendar invite (Make)

Lead scoring: rule-based Hot / Warm / Cold lead ranking (JavaScript)

NBP rates report: daily automated report from an API (Python, GitHub Actions)

Warsaw housing prices: 8,665 listings analysed, valuation calculator (Python)

What I bring to the team

1. **A clean CRM:** a clear pipeline, clean data and permissions that make sense.
2. **Less manual work:** I automate what reps do in email and Excel.
3. **Reports people use:** KPIs for sales and management in Power BI.
4. **I speak sales:** I worked in presales, so I talk to reps as one of them.

Tools and skills

Salesforce · Salesbook (SaaS) · HubSpot · CRM administration · Sales pipeline · Workflow automation · Requirements · UAT · Jira · Confluence · Power BI (DAX) · SQL · Snowflake · Excel / VBA · n8n · Make · Python · APIs · SAP
